## 1 Things to Check

The named asteroids in [Harris, 1994] (most notably 4179 Toutatis) should be checked for TESS observations. As these should tumble.

288 Glauke [Harris, 2015]

# 2 Background writing

The first interstellar object discovered in late 2017 has come to be called 1I/Omuamua. . . .

The Transiting Exoplanet Survey Satellite (TESS) [Ricker et al., 2014] is a large area, high cadence, imaging . . .
